DETAILED ACTION

Double Patenting

1. Claims 1-3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6597712. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the present application recites “wherein a beam splitter is provided between said laser diode and said wavelength selective member” which could be understood as “a polarizer is provided in an optical path between said diode device and said wavelength selective member” since both of “polarizer” and “beam splitter” are positioned at the same location in the laser apparatus while “beam splitter” is well known in the art for polarizing light. Claims 2-3 of the present application also recites “a polarizer” which is an only difference from “a structure” in the prior art where said structure act as a polarizer since it generates reflected light having a degree of polarization different from the incident light.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites in line 15 "laser diode deice" which is lack of antecedence basic.

However, it is understood as laser diode device. Correction is required.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: Claims 4-8 are allowed because the prior art fail to teach or fairly suggest a laser module as recited in the claim, especially with the collimator for collimating incident light of the laser diode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent References

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
